

## PANEL ULTRA 21 dBi 900/1800 MHz GSM

This antenna is designed to be used in places where GSM signal level is too low and doesn't allow correct voice and data transmission through the modem. GSM PANEL ULTRA antenna allows to get better radio signal used in GSM transmission 900/1800 MHz. Using the antenna connected to the modem or telephone allows higher transmission speed due to better signal level and modulation. The antenna was made from the very best materials and is fully weatherproof (humidity, wind, UV).

Notice! To cooperate with GSM networks, the antenna should be set in vertical polarization!

### Properties

Model:	BP-900/1800PL-21	
Gain:	21 dBi	
Operating frequency:	840-960, 1700-1900 MHz	
Vertical beam width:	8 degrees	
Horizontal beam width:	8 degrees	
Impedance:	50 Ohm	
Connector:	N(F) socket	
VSWR:	1.3	
Radiator:	open circuit	
Dimensions:	690 / 690 / 38.1 mm	
Weight:	6.07 kg	
Polarization:	vertical, horizontal, slanting	
Mounting:	Mast handle, diameter from 3/4 to 7/4 inch (allows full rotation and azimuth correction).	

### Characteristics
